

## NFC Inlays & Tags

### Product Range

With a wide selection of antenna choices and protocols, Smartrac's NFC inlays and tags offer great application flexibility and fit-for-function design in the most demanding applications.

NFC 13.56 MHz ISO and NFC Forum-compliant RFID technology is a proven, globally accepted solution for a vast array of markets. The technology is a perfect fit for various NFC applications, such as embedded NFC tags in posters, signs, menus, labels and business cards, which immediately launch mobile phone applications or connect the user to social media websites. Unlike bar codes or QR codes, NFC tags can carry significantly more data, are more secure and can be password protected. Embedded NFC tags can provide detailed and dedicated information about products, brands, consumer endorsements, user manuals, sustainability, recycling, and much more.

Smartrac NFC product portfolio features state-of-the-art product modification to meet different end-application needs. CIRCUS DURA and FLEX are using a special reinforced structure compared to standard inlays it can withstand higher environmental stresses. Whereas CIRCUS TAMPER LOOP comes with a tamper loop design for tamper detection and authentication for smart packaging.

In conjunction with Experiences, a solution based on Smartrac's enablement platform Smart Cosmos, NFC inlays and tags enable brands to turn physical products into digital connections, revolutionizing consumer journeys and product lifecycles.

Smartrac's operations are certified to ISO 9001:2015 Quality Management System and ISO 14001:2015 Environmental Management System standards.

#### Overview

#### Operating Frequency

13.56 MHz

#### International Standards

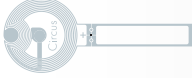

▶ ISO 14443 A, NFC Forum

#### Typical End-user Areas

- ▶ Electronics & Gaming
- ▶ Media & Document Management
- ▶ Product Authentication
- ▶ Packaging
- ▶ Retail
- ▶ ... and many more

## NFC Inlays & Tags

Product Range (selection)

Product	Product Name	IC	Memory	Antenna & Die-cut Size
	<b>CIRCUS™</b>	NXP NTAG210 Micro NXP NTAG213	384 bit / 48 byte 1152 bit / 144 byte	Ø 22 mm / 0.87" Ø 20 mm / 0.79"
	<b>CIRCUS™ DURA / FLEX</b>	NXP NTAG213	1152 bit / 144 byte	Ø 20 mm / 0.79" Ø 22 mm / 0.87"
	<b>CIRCUS™ ON-METAL</b>	NXP NTAG213	1152 bit / 144 byte	Ø 20 mm / 0.79" Ø 22 mm / 0.87"
	<b>CIRCUS™ TAMPER LOOP</b>	NXP NTAG213 TT	1152 bit / 144 byte	24 × 54 × 10 mm 0.95 × 2.1 × 0.39"
	<b>BLOCK ON-METAL</b>	NXP ICode SLIX2	2500 bit / 312.5 byte	47 × 47 mm / 1.77 × 1.77" 50 × 50 mm / 1.96 × 1.96"
	<b>BULLSEYE™</b>	NXP NTAG213 NXP NTAG216	1152 bit / 144 byte 7104 bit / 888 byte	Ø 35 mm / 1.38" Ø 38 mm / 1.50"
	<b>BULLSEYE™</b>	NXP NTAG210	384 bit / 48 byte	Ø 35 mm / 1.38" Ø 38 mm / 1.50"
	<b>BULLSEYE™</b>	Sony FeliCa Lite-S	1792 bit / 224 bytes	Ø 35 mm / 1.38" Ø 38 mm / 1.50"
	<b>BULLSEYE™ ON-METAL</b>	NXP NTAG213	1152 bit / 144 byte	Ø 35 mm / 1.38" Ø 38 mm / 1.50"
